

Implementation Guide EDI Mapping to send in an EDI 404 corrector Message

Version 8030

Purpose of EDI 404 corrector Message

The EDI 404 corrector message is sent by the customer to add or correct information to an existing EDI 404 transmission that we received and created a bill of lading (EDI 404) in our Service Reliability System (SRS).

EDI Version & Guidelines

The EDI 404 corrector message version matches the same version used on the original EDI 404 that we received. We can currently accept up to Version 008030.

Customized Formats

It is entirely the responsibility of the Receiver of the EDI 404 who requires coding or a mapping structure other than what is expressly written in the EDI Guidelines and here in the CN Implementation Guide to have the necessary changes performed at their system or through a Value Added Network (VAN).

Connection to CN

CN has a secure MFT server https://mftedi.cn.ca/ or we can push to an FTP server if you require. CN also connects with all major VAN's (Value Added Networks) and interconnects can be made available.

CN Contact

The EDI Onboarding team email address is EDIMGR@cn.ca. You can also visit us at <u>www.cn.ca</u>.

Canadian National Railway - Electronic Commerce

The enclosed documentation covers information required to submit an EDI 404 corrector transmission to update or add segments to an existing EDI 404 transmission.

Canadian National Railway - Electronic Commerce Original EDI 404 transmission

CN recommends EDI shippers to be within 2 versions of the current EDI Standard X12 Standard Version/Release 8030/RAIL

Criteria for changes to EDI 404 for Carload Shipments

- 1. If a ZC1 segment exists in the EDI 404, it will be used to complete the match and update the original EDI 404.
- 2. If no ZC1 segment is indicated on the EDI 404, the following criteria must be met:

Must be an Inbound EDI 404 The waybill in CN's system must be <u>active</u>. Must match on the original Sender ID (GS02) Must match on the equipment initial/number (N701 and N702) Must match on the bill of lading number (N9*BM)

The following changes CANNOT be accepted to the following data/profiles:

- Shipper Customer (N1*SH and corresponding N3 and N4 segments)
- Consignee Customer (N1*CN and corresponding N3 and N4 segments)
- Care of Customer (N1*C1 and corresponding N3 and N4 segments)
- Shipped From Customer (N1*SF and corresponding N3 and N4 segments)
- Payer of Freight Customer (N1*PF and corresponding N3 and N4 segments)
