

Update on Western Canadian Grain - Crop Year 2025-26 Week 14

Summary:

In grain shipment week 14, CN moved over 748,000 metric tonnes of grain and processed products, meeting supply chain targets and approximately 14% above the three-year average. Vessel delays continued to affect movements into Vancouver as customers were forced to cancel trains throughout the week to avoid congesting terminals with loaded traffic.

CN Maximum Sustainable End-to-End Supply Chain Capacity Guidance

The capacity of Canada's grain supply chain varies through the crop year, and multiple factors place a real limit on the volume of grain that can move through the system at any point in time. The maximum sustainable capacity of the grain supply chain is also a function of the capacity and operational efficiency of the individual pieces of that supply chain, from origin to destination.

It is CN's view that on a sustained basis, the end-to-end grain supply chain can accommodate up to 7,800 cars (or up to 744,000 metric tonnes) per week of bulk grain and processed grain products outside of winter, of which approximately 900 cars per week are anticipated to be shipments of processed grain products. These maximum end-to-end grain supply chain capacity levels on CN assume that multiple conditions must be in place to achieve these levels. These conditions include, but are not limited to, those noted in the chart below:

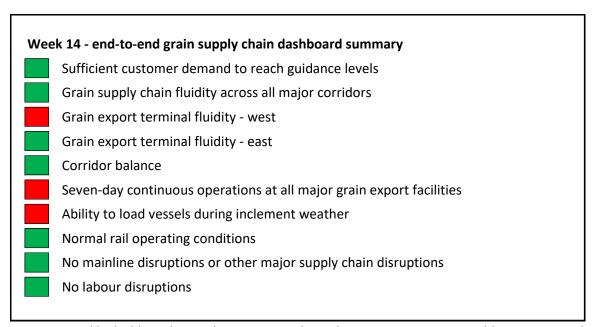

Figure 1. Weekly dashboard – conditions required to achieve maximum sustainable capacity guidance

Grain export terminal fluidity – west

 Vessel delays continued to affect Vancouver, reduced terminal productivity and grain movement to the ports.

Continuous operations at all grain export facilities:

Prince Rupert Grain terminal does not operate 24/7

Vessel loading during inclement weather:

• Limited ability to load vessels in rain

Bulk grain movement:

For grain shipment week 14, CN shipped 6,590 bulk hopper cars, approximately 96% of the maximum sustainable supply chain capacity guidance of 6,900 bulk hopper cars.

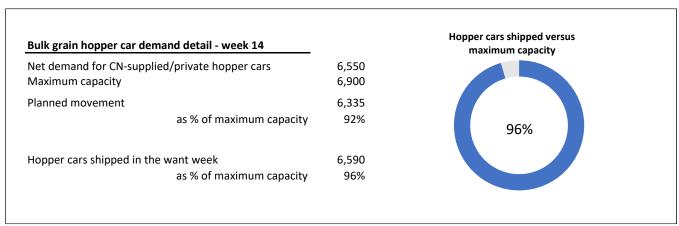

Figure 2. Bulk grain hopper car demand and demand fulfillment

CROP YEAR-TO-DATE SUMMARIES

Figure 3. Crop year-to-date shipments of grain and processed grain products from western Canada

CN moved 8.6 MMT of western Canadian bulk grain through week 14 of Crop Year 2025-26. This tonnage is 6% above the prior three-year average, but 4% below last year.

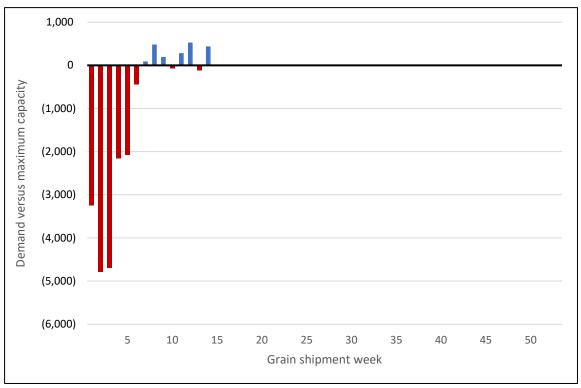

Figure 4. Customer demand for bulk grain movement via hopper car in relation to maximum end-to-end sustainable supply chain capacity on CN for bulk grain movement

Approximately 15,600 hopper cars worth of available grain supply capacity on CN went unutilized through week 14 of the crop year, representing approximately 1.5 million metric tonnes.

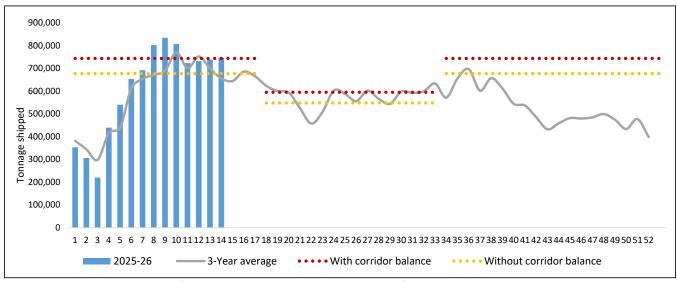

Figure 5. Weekly shipments of grain and processed grain products from western Canada on CN versus maximum end-to-end sustainable supply chain capacity guidance

GRAIN SHIPMENT WEEK 14 – SHIPMENTS OF GRAIN AND PROCESSED GRAIN PRODUCTS

Week 14 (metric tonnes)	Vancouver	Prince Rupert	Thunder Bay	Churchill	N. America Domestic	Total	Carloads
All Grain Supply Chains	389,462	150,672	98,041	0	109,512	747,686	7,728
YTD Shipments (million metric tonnes)							
Common Hopper Fleet	3.4	1.2	1.2	0.0	0.4	6.3	65,139
Customer-supplied equipment ¹	1.4	0.0	0.0	0.0	0.8	2.3	23,877
Total ^{2,3}	4.8	1.2	1.2	0.0	1.2	8.6	89,016

¹ includes bulk and processed grain moving in hopper cars and vegetable oil moving in tank cars

A. Car Demand and Order Planning

- Week 14 net car orders were 5,060. Changes to grain shipment demand in week 14 included:
 - o 112 orders rationed
 - o 621 orders cancelled throughout week 14

	Week 14 Complete (Nov 02 to Nov 08)								
	Common Hopper Fleet	Vancouver	Prince Thund Rupert Bay		Churchill	N. America Totals Domestic		Week 15 Latest	Week 16 Preliminary
	Total Customer Orders	3,202	1,444	735	0	300	5,681	5,814 ⁽²⁾	6,025 ⁽²⁾
	Invalid Customer Orders	0	0	0	0	0	0

B. Car Spotting Performance

- 5,546 empty cars spotted in week 14
- 99.7% spotting performance against the current week's plan
- 100% of planned orders were spotted in the want week or within 24-72 hours of the end of the want week

Year 2025-26 Week 14 Spotting Performance	Planned	Spot Plan Cancelled	Net Plan	Last Week	Cars Spotted Current Week	Total Spotted	Spotting Performance	Unfilled orders rolled to next week
Current Week Plan Authorized New Orders	5,569	(621)	4,948	0	4,932	4,932	100%	16
Prior Week's Orders (rolled forward to current week)	441	(3)	438	-	438	438	100%	0
"Add-in" Cars Ordered after weekly plan is set	-	-	-	-	30	30		
Pre-Spots Early spotting of next week's orders	-	-	-	-	0	0		
Railway shuttles	-	-	-	-	146	146		
Total	6,010	(624)	5,386	0	5,546	5,546
